2006 Aboriginal Population Profile for Timmins

Did you know that ...

- The Aboriginal population living in the census agglomeration (CA) of Timmins is young and growing. In 2006, 3,275 Aboriginal people lived there, a 14% increase from 2001.
- Four in ten Aboriginal people (41%) were under the age of 25, compared to 31% of the non-Aboriginal population.
- Overall, in 2006, Aboriginal youth aged 15 to 24 living in Timmins had similar school attendance rates to their non-Aboriginal counterparts (62% versus 60%). Aboriginal people have a greater tendency to return to school later in life than do non-Aboriginal people.
- Over half of Aboriginal men (53%) and close to half of Aboriginal women (46%) aged 25 to 64 had completed postsecondary education compared to 55% and 52%, respectively of their non-Aboriginal counterparts.
- The unemployment rate for the Aboriginal core working age population (aged 25 to 54) in Timmins was more than three times higher than that of the non-Aboriginal population (13.5% compared to 4.0%). Unemployment rates were higher for women than they were for men, regardless of the population group.
- In 2006, while Métis men (79.5%) and Métis women (65.9%) aged 25 to 54 living in Timmins were less likely to be employed than their non-Aboriginal counterparts (85.9% and 75.8%), their employment rates were higher than First Nations men (62.0%) and First Nations women (50.7%).
- In 2000, Aboriginal people working full-time full-year earned 75% of what their non-Aboriginal counterparts were earning. By 2005, the gap had disappeared.
- The majority of off-reserve First Nations (52%) and Métis (58%) people aged 15 and over living in Ontario rated their health as excellent or very good in 2006.
- Six in ten off-reserve First Nations and Métis adults in Ontario reported that they had been diagnosed with at least one chronic condition. The most commonly reported conditions were: arthritis or rheumatism, respiratory problems, high blood pressure, heart problems or effects of a stroke.

Introduction

This report examines the demographic and socio-economic characteristics of the Aboriginal population living in the census agglomeration (CA) of Timmins¹. The 2006 Census and 2006 Aboriginal Peoples Survey (APS), which provide an extensive set of data about Aboriginal people, are the data sources.

The report focuses on the **Aboriginal identity population**, which refers to those people who reported identifying with at least one Aboriginal group, that is, North American Indian, Métis or Inuit, and/or those who reported being a Treaty Indian or a registered Indian as defined by the *Indian Act of Canada*, and/or those who reported they were members of an Indian band or First Nation.

The term "First Nations" is used throughout the report to refer to people who identified as North American Indian. The term "Aboriginal population" is used to refer to the Aboriginal identity population.

Setting the context

There were 1,172,790 Aboriginal people in Canada in 2006, accounting for 3.8% of Canada's total population.

In 2006, a total of 242,500 Aboriginal people lived in Ontario, representing 2.0% of the provincial population.

There were 3,275 Aboriginal people living in the CA of Timmins in 2006 making up 7.7% of the city's total population. By way of comparison, Toronto had the largest Aboriginal population (26,575) of any city in Ontario, and Kenora had the largest concentration of Aboriginal people of any city in Ontario (16%).

Between 2001 and 2006, the Aboriginal population in Timmins grew by 14%, from 2,880 to 3,275 people. The First Nations population grew by 29%, while the Métis grew by 2%.

Métis - largest Aboriginal group in Timmins

In 2006, 1,690 persons identified as Métis accounting for just over half (52%) of the city's Aboriginal population. Another 1,465 identified as First Nations people, accounting for another 45% of the Aboriginal population in Timmins. Very few (1%) people identified as Inuit. Another 3% reported multiple or other Aboriginal responses².

Of those who identified as First Nations people in 2006, three quarters (75%) reported being a Treaty Indian or a registered Indian as defined by the *Indian Act of Canada*.

1. The geographic area covered in this report is the census agglomeration (CA) of Timmins. A census agglomeration must have an urban core population of at least 10,000. For maps, see:

http://geodepot.statcan.ca/Diss2006/Maps/Maps_Cartes/NONTRACTEDCADA/ON/CADA586-D.pdf

2. Includes people who reported more than one Aboriginal identity group and those who reported being Registered or Treaty Indian and/or member of an Indian band or First Nation without reporting an Aboriginal identity.

About the data sources

The census provides a statistical portrait of Canada and its people. The most recent census was on May 16, 2006.

The 2006 Aboriginal Peoples Survey (APS) was conducted between October 2006 and March 2007. The survey provides extensive data on Inuit, Métis and off-reserve First Nations children aged 6 to 14 and those aged 15 and over living in urban, rural and northern locations across Canada. The Aboriginal Peoples Survey was designed to provide data on the social and economic conditions of Aboriginal people in Canada (excluding reserves).

It was possible to report both single and multiple responses to the Aboriginal identity questions on the census and the APS. Census data used in this article for First Nations people, Métis and Inuit are based on the single responses only. Total Aboriginal identity population counts include people who reported identifying with at least one Aboriginal group, and/or those who reported being a Registered or Treaty Indian, and/or those who reported they were members of an Indian band or First Nation. The Aboriginal Peoples Survey data represent a combination of both the single and multiple Aboriginal identity populations.

Data have been provided for the total Aboriginal identity population and in some cases they have been broken down by Aboriginal group, sex and age group. For Aboriginal groups where the census count of the population aged 15 years and over is 200 or less, only the census count has been provided. No further data are shown due to potential data quality issues that can result from small counts that arise when several variables are cross-tabulated.

A young population

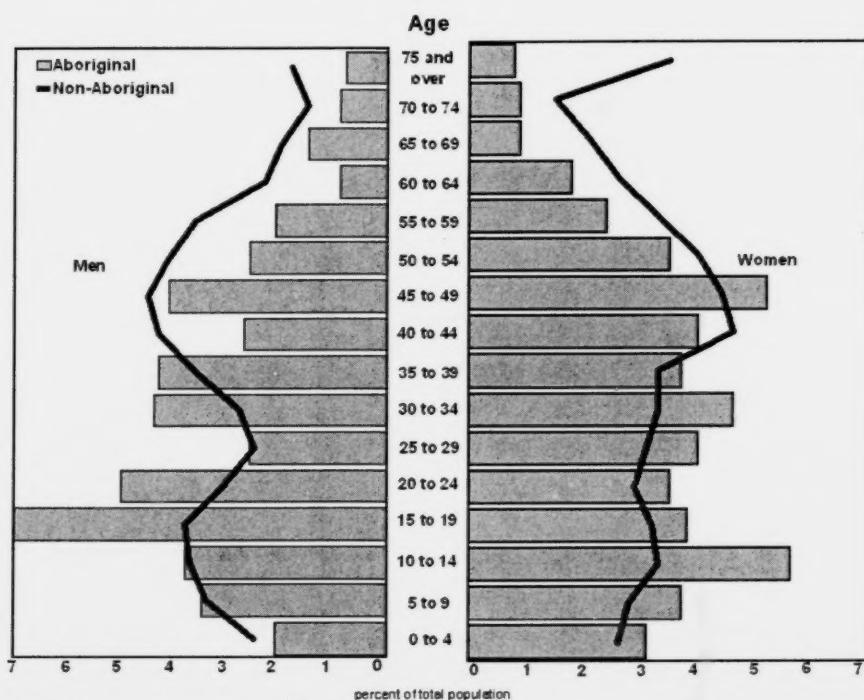

The Aboriginal population living in Timmins is younger than the non-Aboriginal population. In 2006, the median age³ of the Aboriginal population in Timmins was 31.0 years, compared to 40.1 years for the non-Aboriginal population.

In 2006, four in ten (41%) Aboriginal people were under the age of 25, compared to 31% of non-Aboriginal people. Further, only 6% of Aboriginal people were 65 years and over, compared to 12% in the non-Aboriginal population. Just over one-fifth (22%) of Aboriginal people in Timmins were under the age of 15, compared to 18% of their non-Aboriginal counterparts (chart 1). For more details on the age distribution, see table 1 in the appendix.

Aboriginal children aged 14 years and under represented 9% of the city's children. Over one in four (27%) of the First Nations population was 14 years of age and under, compared to 17% of Métis.

3. The median age is the point where exactly one-half of the population is older and the other half is younger.

Chart 1
Population pyramid for the Aboriginal and non-Aboriginal populations, Timmins, 2006

Source: Statistics Canada, Census of population, 2006.

Aboriginal children more likely than non-Aboriginal children to live with a lone parent

In 2006, the majority of Aboriginal children aged 14 and under (67%) lived with both parents. Compared with their non-Aboriginal peers, Aboriginal children were more likely to live with a lone parent (30% versus 18%) (see table 2 in the appendix).

Overall school attendance rates similar for Aboriginal and non-Aboriginal youth but differences for men and women

Overall, in 2006, Aboriginal youth aged 15 to 24 living in Timmins had similar school attendance rates to their non-Aboriginal counterparts (62% versus 60%). However, rates vary for men and women. Young Aboriginal men were more likely to be in school than non-Aboriginal men (66% versus 57%). The opposite was true for young women with 54% of Aboriginal women aged 15 to 24 attending school compared to 64% of non-Aboriginal women in the same age group.

Furthermore, older Aboriginal people (35 years of age or older) have a greater tendency to return to school later in life than do non-Aboriginal people (18% versus 9%), and this holds true for both men and women (see table 3 in the appendix).

The 2006 Aboriginal Peoples Survey found that among the off-reserve Aboriginal population in Ontario, men and women had different reasons for not completing high school. For young Aboriginal men aged 15 to 34, the most commonly reported reason was 'wanted to work', 'pregnancy/taking care of children' topped the reasons provided by Aboriginal women in the same age group.

Majority of Aboriginal men have completed post-secondary education

Over half of Aboriginal men (53%) and close to half of Aboriginal women (46%) aged 25 to 64 had completed postsecondary education compared to 55% and 52%, respectively of their non-Aboriginal counterparts. Postsecondary education includes a trades certificate, a college diploma or a university certificate, diploma or degree. Aboriginal and non-Aboriginal men were most likely to have completed their post-secondary schooling with a trades credential, whereas Aboriginal and non-Aboriginal women were most likely to have obtained a college education (see text table 1).

In 2006, one-quarter (26%) of Aboriginal men and more than one-third (36%) of Aboriginal women 25 to 64 years of age had less than a high school education, compared to 22% of non-Aboriginal men and 21% of non-Aboriginal women in this same age group.

Text table 1

Highest level of educational attainment of people aged 25 to 64 years, by Aboriginal and non-Aboriginal identity and sex, Timmins, 2006

Level of education	Aboriginal population		Non-Aboriginal population	
	Men	Women	Men	Women
	percent			
Total	100.0	100.0	100.0	100.0
Less than high school	26.0	35.8	22.3	20.9
High school	20.8	17.9	22.5	27.0
Total postsecondary	53.2	46.3	55.2	52.1
Trades	23.4	7.4	19.6	6.8
College	20.8	25.8	23.3	30.8
University certificate or diploma below bachelor ¹	1.3	6.3	2.3	2.4
University degree (at bachelor's level or above)	7.8	6.8	10.0	12.0

1. The overall quality of data for the "Highest certificate, diploma or degree" variable in the 2006 Census is acceptable. However, users of data from the category "university certificate or diploma below the bachelor level" should be aware that the 2006 Census showed unexpected growth in this category, compared with 2001. We recommend users interpret the 2006 Census results with caution. For more details, see <http://www12.statcan.ca/census-recensement/2006/ref/info/education-eng.cfm>.

Source: Statistics Canada, Census of population, 2006.

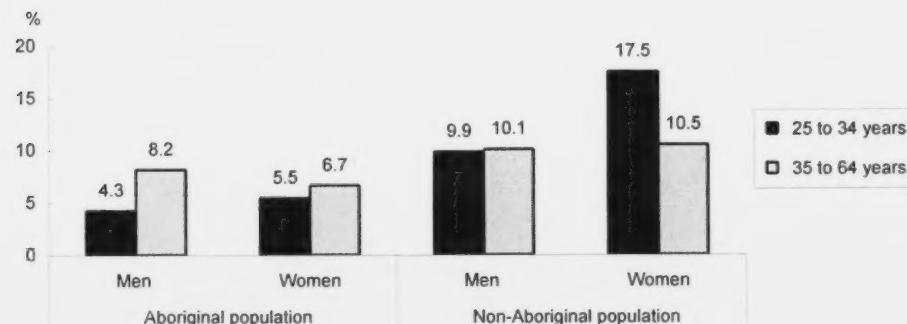

Aboriginal people in Timmins less likely to obtain a university degree

In Timmins, similar proportions of young Aboriginal men and women aged 25 to 34 reported having a university degree, in the 2006 Census (4% and 5%, respectively). (This includes all certificates, diplomas or degrees at the bachelor's level or above.) Furthermore, Aboriginal men and women aged 35 to 64 were more likely to have a university degree than their younger counterparts (8% versus 4% for men and 7% versus 5% for women) (see chart 2).

Regardless of their age group or sex, Aboriginal people living in Timmins in 2006, were less likely than their non-Aboriginal counterparts to have a university degree.

Chart 2

Percentage of Aboriginal and non-Aboriginal people 25 to 34 and 35 to 64 years of age with a university degree, Timmins, 2006

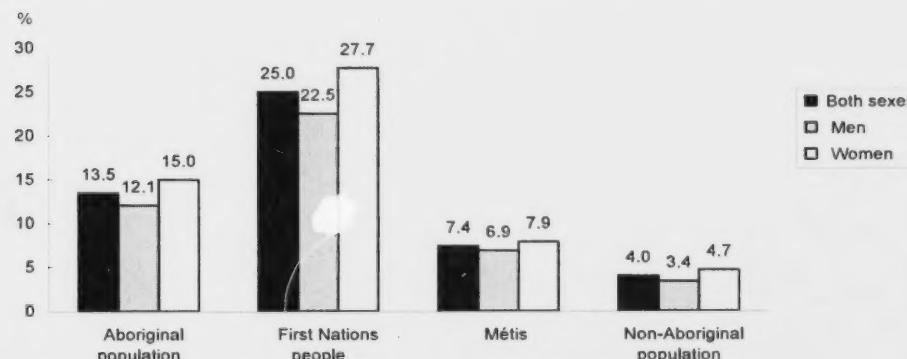

Source: Statistics Canada, Census of population, 2006.

Higher unemployment rates

In 2006, the unemployment rate⁴ for the Aboriginal core working age population (aged 25 to 54) in Timmins was more than three times higher than that of the non-Aboriginal population (13.5% versus 4.0%). Unemployment rates were higher for women than they were for men, regardless of the population group.

Chart 3

Unemployment rates for people aged 25 to 54 years, by Aboriginal identity group and sex, Timmins, 2006

Note: First Nations people and Métis include persons who reported a single identity only.

Source: Statistics Canada, Census of population, 2006.

Unemployment rates were much higher for Timmins's young people. In 2006, 38.7% of First Nations youth aged 15 to 24 years were unemployed, as were 31.2% of Métis youth, and 16.8% of non-Aboriginal youth (see table 4 in the appendix).

4. The unemployment rate for a particular group is the unemployed in that group, expressed as a percentage of the labour force in that group, in the week (Sunday to Saturday) prior to Census day (May 16, 2006).

Métis more likely to be employed than First Nations

Another measure of labour market performance is the employment rate⁵. In 2006, while Métis men (79.5%) and Métis women (65.9%) aged 25 to 54 living in Timmins were less likely to be employed than their non-Aboriginal counterparts (85.9% and 75.8%), their employment rates were higher than First Nations men (62.0%) and First Nations women (50.7%) (see table 5 in the appendix).

Aboriginal people less likely to be working full-time full-year

Three in ten (30%) Aboriginal people living in Timmins were working full-time full-year⁶ in 2005, compared to 39% of the non-Aboriginal population. Men were more likely than women to be full-time full-year workers. Over one-third (36%) of Aboriginal men and almost half (47%) of non-Aboriginal men worked full-time full-year compared to 25% of Aboriginal women and 31% of non-Aboriginal women.

Métis men and women in the Timmins labour force were more likely than their First Nations counterparts to be working full-time full-year in 2005. Four in ten (41%) Métis men and almost one-third (32%) of Métis women were working full-year full-time compared to 29% of First Nations men and 19% of First Nations women (see text table 2).

Text table 2

Percentage of full-time full-year workers, by Aboriginal and non-Aboriginal identity and sex, Timmins, 2005

Population groups	Both sexes	Men	Women
	percent		
Total Aboriginal population	30.3	35.7	24.7
First Nations people ¹	23.0	28.9	19.0
Métis ¹	36.6	40.7	31.8
Non-Aboriginal population	38.6	46.5	31.0

1. First Nations people and Métis include persons who reported a single identity only.

Source: Statistics Canada, Census of population, 2006.

Occupations in 'sales and services' most prevalent

In studying the labour market of a given area, it is helpful to examine its occupational⁷ make-up. In 2006, the most common occupational category⁸ for both the Aboriginal and non-Aboriginal experienced labour forces in Timmins was 'sales and service'. Almost three in ten (28%) Aboriginal people held these jobs as did 25% of non-Aboriginal workers.

The kinds of jobs people hold differ for men and women. For example, men were much more likely than women to work in 'trades, transport and equipment operators and related occupations'. Women were much more likely than men to work in 'business, finance and administrative' occupations. This holds true for both the Aboriginal and the non-Aboriginal populations in Timmins.

5. The employment rate refers to the number of employed people, in a given group, as a percentage of the total population in that group.
 6. The term 'full-time full-year workers' refers to persons 15 years of age and over who worked 49 to 52 weeks (mostly full time) in 2005 for pay or in self-employment.

7. Occupation refers to the kind of work persons were doing during the reference week, as determined by their kind of work and the description of the main activities in their job. If the person did not have a job during the week (Sunday to Saturday) prior to enumeration, the data relate to the job of longest duration since January 1, 2005. Persons with two or more jobs were to report the information for the job at which they worked the most hours.

8. Occupations contained within the categories can cover a broad range of skill levels. For example, the business and finance occupation category includes professional occupations requiring a university degree, as well as clerical occupations that require a high school diploma or equivalent.

In 2006, Aboriginal men were as likely as their non-Aboriginal counterparts to work in 'trades, transport and equipment operators and related occupations' (35% versus 34%). However, Aboriginal women were more likely than non-Aboriginal women to have 'sales and service' jobs (39% versus 33%) (see table 6 in the appendix).

Median earnings improving for Aboriginal people

In 2000, the median earnings⁹ of full-time full-year Aboriginal earners in Timmins (measured in 2005 dollars) were \$36,093. By 2005, this had increased to \$45,302. Furthermore, Aboriginal people working full-time full-year in 2000 earned 75% of what their non-Aboriginal counterparts were earning. By 2005, the gap had disappeared (see table 7 in the appendix).

Total income lower for Aboriginal people

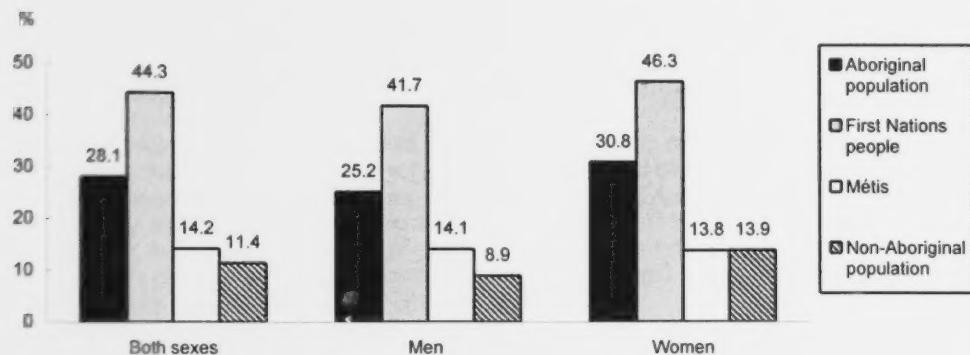

The census collects a number of measures of income that help in understanding the economic situation of a population. Earnings data have been provided above for the population working full-time full-year in 2005. It is also useful to look at total income¹⁰ as sources of income go beyond that of employment. In 2005, one-quarter (26%) of Aboriginal people with income in Timmins had a *total* income of \$40,000 or over compared to one-third (34%) of their non-Aboriginal counterparts. In 2005 Aboriginal women had the lowest median income (\$16,929), whether compared to Aboriginal men (\$25,469) or to non-Aboriginal men (\$38,019) or non-Aboriginal women (\$19,730) (see table 8 in the appendix).

In understanding these data, it is important to note that, in Timmins, 7% of the Aboriginal population 15 and over and 4% of the their non-Aboriginal counterparts reported having no income in 2005 (data not shown).

Nearly three in ten Aboriginal people in Timmins living below the low-income cut-off

Statistics Canada uses the concept of low-income cut-off (LICO)¹¹ to indicate an income threshold below which a family will likely devote a larger share of its income on the necessities of food, shelter and clothing than the average family. In 2005, in Timmins nearly three in ten (28%) Aboriginal people were living under the low-income cut-off, compared to 11% of non-Aboriginal people. In addition, half (50%) of Aboriginal children (aged 14 years and under) in Timmins were living under the low-income cut-off, compared to 13% of non-Aboriginal children (data not shown). These data are based on the *before tax* LICO.

-
9. Median earnings are earnings levels that divide the population into two halves, i.e., half of the population receiving less than this amount, and half, more. Earnings or employment income refers to the income received by persons 15 years of age and over during calendar year 2005 as wages and salaries, net income from a non-farm unincorporated business and/or professional practice, and/or net farm self-employment income.
 10. Total income refers to the total money income received from the following sources during calendar year 2005 by persons 15 years of age and over: wages and salaries (total), net farm income, net non-farm income from unincorporated business and/or professional practice, child benefits, Old Age Security Pension and Guaranteed Income Supplement, benefits from Canada or Quebec Pension Plan, benefits from Employment Insurance, other income from government sources, dividends, interest on bonds, deposits and savings certificates, and other investment income, retirement pensions, superannuation and annuities, including those from RRSPs and RRIFs, other money income.
 11. The low-income cut-off is a statistical measure of the income threshold level below which Canadians are estimated to devote at least one-fifth more of their income than the average family to the necessities of food, shelter and clothing. For the 2005 matrix of low income before-tax cut-offs and additional information, please refer to the *2006 Census Dictionary*, Catalogue no. 92-566-X.

Chart 4**Proportion of persons living below the before-tax low income cut-off by Aboriginal identity group and sex, Timmins, 2005**

Note: First Nations people and Métis include persons who reported a single identity only.

Source: Statistics Canada, Census of population, 2006.

More than half of the Timmins's Aboriginal population moved at least once between 2001 and 2006

The Census counts people where they are living on one particular day. On May 16, 2006 (the date of the 2006 Census) there were 3,275 Aboriginal people living in the census agglomeration of Timmins. This count does not include all of the Aboriginal people who may have lived in Timmins at some point during the year, but only those who were living in Timmins on that particular day¹².

When looking at the Census population counts, it is important to remember that many people move between communities - for example, someone might move from a reserve community to a large city and back again within the same year. In Timmins, in 2006, close to half (47%) of the Aboriginal population had lived at the same address five years ago, compared to 62% of the non-Aboriginal population. From 2001 to 2006, one-third (32%) of Aboriginal people had moved at least once within Timmins, and the rest (21%) had moved to Timmins from another community. A community may refer to another municipality, or a reserve or a rural area (see table 9 in the appendix).

When asked on the 2006 Aboriginal Peoples Survey why they moved to their current city, town or community, most off-reserve Aboriginal people in Ontario reported family-related reasons, followed by work-related reasons.

One in eight live in homes needing major repairs

In Timmins, about one in eight (12.0%) Aboriginal people lived in homes requiring major repairs¹³ in 2006, compared to 16.2% in 2001. In comparison, the share of Timmins's non-Aboriginal population living in dwellings in need of major repairs was 7.2% in 2006 compared to 7.6% in 2001.

The share of Aboriginal people living in crowded¹⁴ homes was 2.0% in 2006 compared to 5.4% in 2001. The comparable rates for the non-Aboriginal population were 0.3% in 2006 and 0.6% in 2001 (see table 10 in the appendix).

12. For example, students who return to live with their parents during the year are included at their parents' address, even if they lived elsewhere while attending school or working at a summer job.

13. Dwellings in need of major repairs are those that, in the judgment of the respondent, require major repairs to such things as defective plumbing or electrical wiring, and/or structural repairs to walls, floors or ceilings, etc.

14. Crowding is defined as more than one person per room. Not counted as rooms are bathrooms, halls, vestibules and rooms used solely for business purposes.

Majority report being healthy

The majority of off-reserve First Nations and Métis adults (the population aged 15 and over) living in *Ontario*¹⁵ rated their health as excellent or very good in 2006. When asked as part of the 2006 Aboriginal Peoples Survey whether their health was excellent, very good, good, fair or poor, 52% of the off-reserve adult First Nations population and 58% of Métis adults gave themselves a rating of excellent or very good. A further 26% of First Nations adults and 25% of the Métis adult population reported that their health was good.

Six in ten adults live with one or more chronic conditions

The 2006 Aboriginal Peoples Survey also inquired about chronic conditions¹⁶ that had been diagnosed by a health professional. Six in ten off-reserve First Nations (60%) and Métis (59%) adults living in *Ontario* reported that they had been diagnosed with at least one chronic condition. Among the First Nations adult population, the most frequently reported conditions were: arthritis or rheumatism (25%), respiratory problems¹⁷ (22%) and high blood pressure, heart problems or effects of a stroke (22%). Among the Métis, arthritis or rheumatism was the most commonly reported condition affecting 24% of adults followed by high blood pressure, heart problems or effects of a stroke (23%) and respiratory problems (22%).

15. Data on health is not available for Timmins so provincial level data has been provided.

16. Chronic conditions were those that had lasted or were expected to last six months or more and had been diagnosed by a health professional.

17. Respiratory problems include asthma, chronic bronchitis and emphysema.

Table 2
Living arrangements of Aboriginal and non-Aboriginal children aged 14 years and under, Timmins, 2006

Living arrangements	Aboriginal children	Non-Aboriginal children
	percent	percent
Total - children 14 years and under	100.0	100.0
Total living with at least one parent	97.2	99.1
Living with two parents ¹	67.1	81.5
Living with a lone mother	28.7	14.8
Living with a lone father	1.4	2.9
Total living with a grandparent (no parent present)	1.4	0.8
Total living with another relative	1.4	0.1

1. "Living with two parents" includes those living with step-parents. Information on step-parents is not available separately.

Source: Statistics Canada, Census of population, 2006.

Table 3
School attendance rates of Aboriginal and non-Aboriginal populations, by sex and age group, Timmins, 2006

Age groups	Aboriginal population			Non-Aboriginal population		
	Both sexes	Men	Women	Both sexes	Men	Women
	percent					
Total - 15 and over	24.8	28.0	21.6	13.8	13.0	14.5
15 to 24	61.7	66.3	54.2	60.1	56.9	63.7
25 to 34	16.8	10.6	23.6	11.4	10.1	12.7
35 to 44	9.4	6.7	10.0	6.6	4.7	8.5
45 and over	8.5	13.1	9.8	2.7	1.9	3.3

Note: A new version of the school attendance question was used in the 2006 Census. Studies on data certification showed important variations with previous censuses and with the Labour Force Survey. It appears that the 2006 Census could have overestimated the school attendance for the population aged 45 years or over. We recommend users of the attendance at school variable interpret the 2006 Census results with caution. For more details on the changes to the questionnaire for the Education module, see <http://www12.statcan.ca/census-recensement/2006/ref/info/education-eng.cfm>.

Table 4
**Unemployment rate of youth aged 15 to 24 years, by sex and population group,
Timmins, 2006**

Population groups	Both Sexes	Men	Women
	percent		
Total Aboriginal population	34.1	37.7	28.6
First Nations people ¹	38.7	47.1	28.6
Métis ¹	31.2	32.4	28.6
Non-Aboriginal population	16.8	15.6	18.0

1. First Nations people and Métis include persons who reported a single identity only.

Note: The unemployment rate for a particular group (age, sex, marital status, geographic area, etc.) is the unemployed in that group, expressed as a percentage of the labour force in that group, in the week (Sunday to Saturday) prior to Census day (May 16, 2006).

Source: Statistics Canada, Census of population, 2006.

Table 5
**Employment rates of people aged 25 to 54 years, by sex and population group,
Timmins, 2006**

Population groups	Both Sexes	Men	Women
	percent		
Total Aboriginal population	66.1	74.5	58.6
First Nations people ¹	55.0	62.0	50.7
Métis ¹	73.5	79.5	65.9
Non-Aboriginal population	80.7	85.9	75.8

1. First Nations people and Métis include persons who reported a single identity only.

Note: The employment rate for a particular group (age, sex, marital status, geographic area, etc.) is the number of persons employed in the week (Sunday to Saturday) prior to Census day (May 16, 2006), expressed as a percentage of the total population, in that particular group.

Source: Statistics Canada, Census of population, 2006.

Table 6
**Occupational distribution of Aboriginal and non-Aboriginal experienced labour force
 15 years of age or older, Timmins, 2006**

Occupational categories	Aboriginal population			Non-Aboriginal population		
	Both sexes	Men	Women	Both sexes	Men	Women
	percent					
All occupations	100.0	100.0	100.0	100.0	100.0	100.0
Management	4.8	5.4	4.1	8.1	9.8	6.1
Business, finance and administrative	19.6	9.6	30.8	17.5	7.4	29.2
Natural and applied sciences and related occupations	4.5	7.2	1.4	4.9	7.5	1.9
Health	5.5	3.0	8.9	5.9	1.7	10.8
Occupations in social science, education, government service and religion	5.5	3.6	7.5	8.1	4.3	12.4
Occupations in art, culture, recreation and sport	2.3	0.0	3.4	1.2	0.8	1.7
Sales and service	28.3	19.2	39.0	25.4	18.6	33.2
Trades, transport and equipment operators and related occupations	19.3	34.7	2.1	19.4	33.8	3.0
Occupations unique to primary industry	5.8	9.6	1.4	6.6	11.3	1.2
Occupations unique to processing, manufacturing and utilities	4.5	7.8	1.4	2.8	4.8	0.5

Note: Occupation refers to the kind of work persons were doing during the reference week, as determined by their kind of work and the description of the main activities in their job. If the person did not have a job during the week (Sunday to Saturday) prior to enumeration (May 16, 2006), the data relate to the job of longest duration since January 1, 2005. Persons with two or more jobs were to report the information for the job at which they worked the most hours.

Table 7**Median earnings, in 2005 constant dollars, of full-time full-year earners by population group, Timmins, 2000 and 2005**

Sex	2000		2005	
	Aboriginal population	Non-Aboriginal population	Aboriginal population	Non-Aboriginal population
		dollars		dollars
Both sexes	36,093	48,265	45,302	44,787
Men	48,964	56,239	50,791	53,880
Women	28,153	35,846	34,433	34,913

Notes: Median earnings are earnings levels that divide the population into two halves, i.e., half of the population receiving less than this amount, and half, more. Earnings or employment income refers to the income received by persons 15 years of age and over during calendar year 2005 as wages and salaries, net income from a non-farm unincorporated business and/or professional practice, and/or net farm self-employment income. The earnings in 2000 and 2005 are calculated in constant dollars for the year 2005.

Full-time full-year earners worked 49 to 52 weeks during the year preceding the census, mainly full-time (i.e., 30 hours or more per week). Individuals with self-employment income are included.

Those living in institutions are excluded.

Sources: Statistics Canada, censuses of population, 2001 and 2006.

Table 8**Median income and distribution of total income of Aboriginal and non-Aboriginal people 15 years of age or older with income, Timmins, 2005**

Median income and distribution	Aboriginal population			Non-Aboriginal population		
	Both sexes	Men	Women	Both sexes	Men	Women
				percent	percent	percent
Population 15 years and over with an income	100.0	100.0	100.0	100.0	100.0	100.0
Under \$20,000	47.9	36.7	58.3	38.8	26.5	50.5
\$20,000 to \$39,999	26.7	27.5	25.5	27.4	26.3	28.5
\$40,000 and over	25.6	35.8	16.2	33.8	47.2	21.0
Median income (\$)	\$20,789	\$25,469	\$16,929	\$26,846	\$38,019	\$19,730

Note: Median income (of individuals) - The median income of a specified group of income recipients is that amount which divides their income size distribution into two halves, i.e., the incomes of the first half of individuals are below the median, while those of the second half are above the median. In this report, the term "income" refers to the total money income received from various sources during calendar year 2005 by persons 15 years of age and over.

Table 9
Mobility status of Aboriginal and non-Aboriginal people 5 years of age or older, by sex, Timmins, 2006

Mobility status	Aboriginal population			Non-Aboriginal population		
	Both sexes	Men	Women	Both sexes	Men	Women
	percent					
Total population 5 years of age or older	100.0	100.0	100.0	100.0	100.0	100.0
Lived at same address (dwelling) 5 years ago	46.7	53.6	40.1	61.6	61.8	61.5
Lived in same community but at a different address (dwelling)	32.4	26.6	37.9	28.3	27.8	28.7
Lived in a different community	20.9	19.7	22.1	10.1	10.4	9.9

Source: Statistics Canada, Census of population, 2006.

Table 10
Housing conditions of Aboriginal and non-Aboriginal people, Timmins, 2001 and 2006

Housing conditions	2001		2006	
	Aboriginal population	Non-Aboriginal population	Aboriginal population	Non-Aboriginal population
	percent			
Population living in crowded dwellings	5.4	0.6	2.0	0.3
Population living in dwellings in need of major repairs	16.2	7.6	12.0	7.2

Notes: Crowding is defined as more than one person per room. Not counted as rooms are bathrooms, halls, vestibules and rooms used solely for business purposes.

Dwellings in need of major repairs are those that, in the judgement of the respondent, require major repairs to such things as defective plumbing or electrical wiring, and/or structural repairs to walls, floors or ceilings, etc.

Sources: Statistics Canada, censuses of population, 2001 and 2006.
